PARTS DIAGRAM

1. Bracket
2. Power Cord
3. Mount
4. Spectral Tuning Control
5. External Controller Port
6. Venting Holes
7. Light Intensity Control
8. Lens
9. DC Power Supply

INSTALLATION GUIDE

1. Remove contents from package.
2. Secure designated mount (B) to unit with screws, and screw gooseneck to attach mount (gooseneck sold separately).
3. Hang the A160WE 1 to 2 ft. above the object to be illuminated.
4. Connect power cord (A) to the specified DC power supply (I).
5. Plug the power supply into an outlet with the correct specifications (see product specifications for more information).
6. Adjust the Light Intensity Control (F) and the Spectral Tuning Control (C) to the desired setting. A160WE Tuna Blue tunes from 10,000K - Actinic. A160WE Tuna Sun tunes from 6,000K - 9,000K.
7. The jacks beneath the controls can be connected to an external 0–10V controller. Please consult your controller’s owner manual for more information.

| Listed Power Supply | Input: 100-240 VAC 50-60 Hz  
                          Output: 19 VDC, maximum 3.42A  
                                      24 VDC, maximum 2.10A |

SAFETY INSTRUCTIONS

1. DO NOT use a power supply that is outside the specifications. This is a fire hazard and may lead to unit failure.
2. DO NOT use outdoors. This unit is intended for indoor use only.
3. DO NOT expose unit to an extremely humid environment or submerge unit in water. This may lead to unit failure.
4. DO NOT place working illuminator in close contact with any objects. This may cause the objects to heat up and the unit to overheat.
5. KEEP lens away from sharp objects. This may break the lens and lead to unit failure.
6. DO NOT cover or place objects on the power supply. Power supply should not be contained in an airtight space.

INSTRUCTIONS DE SECURITÉ

2. NE PAS UTILISER à l’extérieur. Cette unité est prévue pour une utilisation en intérieur.
4. NE PLACEZ PAS l’illuminateur en marche, en contact direct avec d’autres objets. Cela pourrait causer un réchauffement trop élevé de ces derniers et pourrait faire surchauffer l’unité.
5. GARDEZ la lentille (H) à l’écart des objets pointus. Les objets pointus pourraient casser la lentille et endommager l’unité.
6. NE RECOUVREZ PAS, ou ne placez pas d’objet sur le câble d’alimentation. Le câble ne doit pas se trouver dans un espace fermé.
MAINTENANCE

1. Keep the air venting holes (E), and fan clear of dust. To clean the fan, unplug the unit and insert the tip of a CO2 dust blower (or similar dust blower) in one of the venting holes (E) on the unit’s outer shell. Hold and spray. You can also gently vacuum the light through the venting holes.

2. Keep the lens (G) clean. If the lens becomes contaminated with water, dust, or other particles, unplug the unit and clean the lens with isopropyl alcohol. Wet a cotton swab or a napkin in isopropyl alcohol, gently wipe the surface of the lens, and let it dry.

TROUBLESHOOTING GUIDE

CABLES

Available cables:
- Control Cable (Please consult kessil.com for list of available cables and compatible controllers).
- Unit Link Cable (6' male/male with 3.5 mm stereo jack).
- Control Extension Cable (6' male/female with 3.5 mm stereo jack).

STARTING A CHAIN

Connect two or more lights with the Kessil Link Cable, as shown to the above.

CONTROL METHODS

There are two ways to control a chain of lights:
- With an external controller;
- Without external controller (Tuning Controls on first light control all other lights in chain).

Should a longer cable be needed, the Kessil Extension Link Cable may be used.

Each light has its own independent power supply. Any number of lights can be daisy chained together without degradation of signal. However, in longer chains a slight delay in response may occur. Manual tuning is disabled when device senses input cable.
